

## How to use Panel Cutting Conversion Template.

1. Remove existing IC-M505/M503/M501 /DS100/MA-500TR.

2. Existing cut-out revealed.

3. Align and fix cutting template (we suggest adhesive tape). You may wish to mark the new areas to be cut out on your panel and remove paper template before cutting out the two additional width sections as shown.

4. Newly prepared cut-out.

5. Position conversion plate over hole.

6. Fit new IC-M323/M423 using MB132 flush-mount kit.

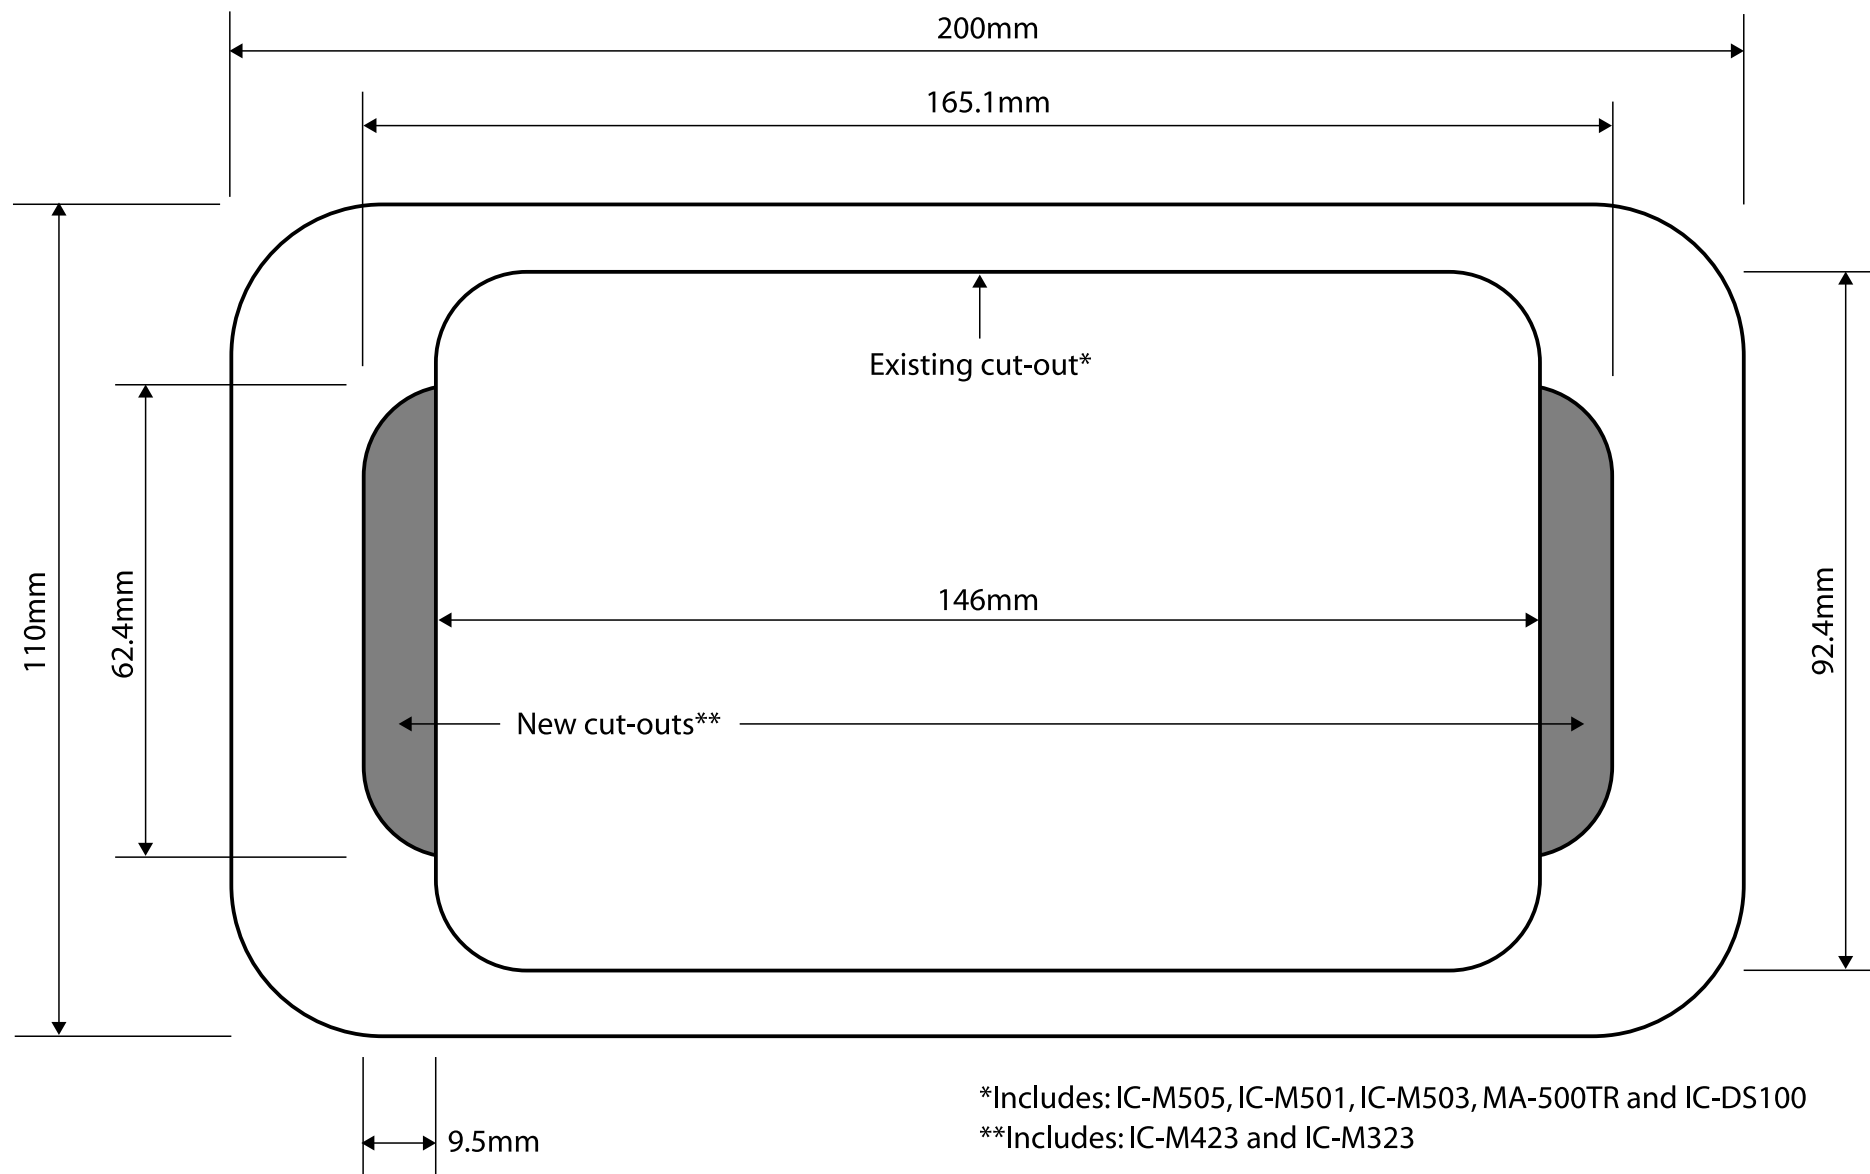

# Panel Cutting Conversion Template

For ICOM conversion plate Part No: Mount.003

NB: This conversion plate should be used in conjunction with the MB-132 flush-mount kit.

Shaded grey shows areas to be cut out of boat panel to accommodate IC-M423/M323 VHF radios.
